Green World Group Completes Major Process Safety Audit in Hitech Industries, Dubai

A 4 days major process Safety Audit was completed by Green World Group in Hitech Industries, Dubai United Arab Emirates. Hitech Industries is a leading manufacturer of solvent based and water based polymeric resins for over 25 years. The plant is currently in operation in Dubai with a current capacity of 100 KT. During the 4 days rigorous audit all the areas were audited against various standards.

The Audit process was conducted in 3 stages

- Identify and benchmark what is in place currently against any pertinent regulatory requirements, industry norms, standards and best practices.
- Identify what should be in place and if there are gaps or weakness in key processes that should be made good before going forward
- Development of an action plan to address the gaps and shortfalls. The Audit process involved an in-depth examination of Hitech Industries entire process safety management system, asset integrity, fire protection arrangements, environmental protection arrangements and several other parameters. A detailed report Of 700 pages was issued to the company with various test reports and corrective actions. The audit was led by our CEO – Shanker Sreekumar who has a total of 18 years of experience in Health and Safety with a team of 4 HSE Engineers.
